Carrier Service Level Agreements

Document code: OPS-TBL-002 · Version 1 · Effective date: 2025-03-01 · Owner: Transportation · Classification: Internal

About This Summary

This document summarizes the service level agreements (SLAs) Nimbus has with its main carriers for 2025. Transportation planners use it to choose carriers and to check performance in the monthly carrier review. Full contracts are held by the Transportation team.

Carrier SLA Table

Carrier	Mode	On-time target	Pickup cutoff	Claims window	Late penalty	Hazmat approved
SwiftFreight	LTL	95%	16:00	30 days	2% of monthly invoice	Yes
BlueLine Parcel	Parcel	97%	18:00	15 days	Service credit per late parcel	No
Lonestar Trucking	Full truckload	96%	14:00	30 days	3% of monthly invoice	Yes
Coastal Intermodal	Rail intermodal	90%	12:00	45 days	1% of monthly invoice	No
RapidAir Cargo	Air freight	98%	15:00	14 days	Full refund of late shipment	No
Midwest Haul	LTL	94%	17:00	30 days	2% of monthly invoice	Yes

How Performance Is Measured

On-time performance is measured each month as the share of shipments delivered by the promised date. Shipments delayed by weather events declared by the National Weather Service are excluded. Carriers that miss their target for two months in a row are placed on a performance improvement plan.

Claims

Damage and loss claims must be filed with the carrier within its claims window, counted from the delivery date. Claims are filed by the Transportation team using the evidence collected during receiving, including photos and damage tags.

Penalties and Credits

Penalties are calculated by Finance at month-end and deducted from the next carrier invoice. Planners must not agree to waive penalties; waivers require approval from the Transportation Director and the Finance Controller.

Choosing a Carrier

Hazardous material shipments may only use carriers approved for hazmat in the table above. For time-critical shipments, planners should prefer carriers with on-time targets of 97% or higher.
